#### **Agenda**

Introductions - All

Discussion Items:

##### **1. Testing Lab Status**

- a. TEC was selected to do the testing and they having been preparing for the submission cycle to open
- b. Ryan will reach out to TEC and see how long they think it will take for a product to complete testing
- c. The submission cycle will open Monday October 2<sup>nd</sup> 2017.
- d. We do not anticipate many manufacturers requesting the parallel plate test
  - i. VDOT has submitted some proposed changes for parallel plate testing.

##### **2. Datamine Status**

- a. Datamine final review has been developed and approved by NTPEP staff
- b. It should go live by Friday, September 22, 2017.
- c. must review the standard data display sheet
- d.

- e. If you see a bug on the module please contact Ryan Fragapane
  - i. Fatal Flaws discovered in the program will be addressed prior to implementation
  - ii. Enhancements will be addressed in a later version
- f. State members who already have DataMine accounts may need to have SAPL added to their account. **Ryan will make sure everyone on the committee has access. If you cannot see the SAPL module please let Ryan Fragapane know.**
- g. **Ryan will work with Jeff and Brian to create a data sheet.**

### 3. Pooled Funded Research Status

- a. University of Texas at Arlington was selected.
- b. The DOTs sponsoring the pooled fund are OH, MN, NC, NY, PA, and FL.
  - i. Looking for example installations, specifications and calculations
  - ii. If you are not a member of the pooled fund but have that information please send it to Jeff Syar.

### 4. Future Work Plan Suggestions/Revisions

- a. **Please submit all revisions to Jeff Syar by November 30<sup>th</sup>.**
- b. Jeff will compile all of the suggestions and send it out to the committee for review.
- c. At the annual meeting in April the committee can vote in person on the suggested changes.
- d. **CCCP items from states by end of October include calculations**
